

EasyPay - Online Build Guide

Build your APK online without installing anything on your computer!

Option 1: GitHub Actions (Recommended - FREE)

Step 1: Create GitHub Account

1. Go to <https://github.com>
2. Sign up for free account
3. Verify email

Step 2: Create Repository

1. Click "+" icon → "New repository"
2. Name: `EasyPay-Android`
3. Description: "EasyPay Mobile Banking App"
4. Select "Public"
5. Click "Create repository"

Step 3: Upload Project Files

1. Click "Add file" → "Upload files"
2. Drag and drop the entire `/home/ubuntu/EasyPay-Android` folder
3. Or use Git:

Bash

```
cd /home/ubuntu/EasyPay-Android
git init
git add .
git commit -m "Initial commit"
git branch -M main
git remote add origin https://github.com/YOUR_USERNAME/EasyPay-Android.git
git push -u origin main
```

Step 4: Build APK

1. Go to your repository on GitHub
2. Click "Actions" tab

3. Click "Build EasyPay APK" workflow
4. Click "Run workflow"
5. Wait 5-10 minutes for build to complete

Step 5: Download APK

1. Go to "Actions" tab
 2. Click the latest build
 3. Scroll down to "Artifacts"
 4. Click "app-release" to download
 5. Extract the ZIP file
 6. You have `app-release.apk` !
-

Option 2: Codemagic (FREE)

Step 1: Sign Up

1. Go to <https://codemagic.io>
2. Click "Sign up"
3. Choose "GitHub" as login method
4. Authorize Codemagic

Step 2: Connect Repository

1. Click "Apps"
2. Click "Add application"
3. Select your EasyPay-Android repository
4. Click "Finish"

Step 3: Configure Build

1. Click "Start your first build"
2. Select "Android" template
3. Review build configuration
4. Click "Save configuration"

Step 4: Build APK

1. Click "Build" button
2. Wait for build to complete (5-10 minutes)
3. Check build status

Step 5: Download APK

1. Click "Artifacts"
 2. Download `app-release.apk`
 3. Ready to install!
-

Option 3: Bitrise (FREE)

Step 1: Sign Up

1. Go to <https://bitrise.io>
2. Click "Sign up"
3. Choose "GitHub" login
4. Authorize Bitrise

Step 2: Add App

1. Click "Add new app"
2. Select your repository
3. Choose "Android" project type
4. Click "Next"

Step 3: Configure Build

1. Select branch: `main`
2. Review Android configuration
3. Click "Confirm"

Step 4: Build APK

1. Click "Start build"
2. Wait for build to complete

3. Monitor build progress

Step 5: Download APK

1. Click "Artifacts"
 2. Download `app-release.apk`
 3. Done!
-

Quick Comparison

Service	Cost	Time	Ease	Support
GitHub Actions	FREE	5-10 min	★★★★★	Excellent
Codemagic	FREE	5-10 min	★★★★★	Great
Bitrise	FREE	5-10 min	★★★★★	Great

Troubleshooting

Build Fails: "Gradle sync failed"

- Check that all files are uploaded
- Ensure `build.gradle` files are present
- Verify `gradlew` file exists

Build Fails: "Could not find Android SDK"

- This is normal - the CI system installs it
- Just wait for build to complete
- Check build logs for details

Build Takes Too Long

- First build: 10-15 minutes (downloads dependencies)
- Subsequent builds: 5-10 minutes
- This is normal

APK Not Found

- Check build status is "Success"
 - Look in "Artifacts" section
 - Try rebuilding
-

After Building

Install on Phone

1. Download APK
2. Transfer to phone
3. Open file manager
4. Tap APK file
5. Tap "Install"
6. Done!

Deploy to Play Store

1. Create Google Play Developer account (\$25)
 2. Create app listing
 3. Upload APK
 4. Fill in details
 5. Submit for review
-

Recommended: GitHub Actions

Why GitHub Actions?

-  Completely FREE
-  Integrated with GitHub
-  Easy to set up
-  Reliable builds
-  Good documentation
-  No account needed (use GitHub)

Steps Summary:

1. Create GitHub account (free)
 2. Create repository
 3. Upload EasyPay-Android files
 4. Click "Actions" → "Run workflow"
 5. Download APK in 5-10 minutes
-

File Locations After Build

GitHub Actions:

- Location: Actions → Build → Artifacts
- File: `app-release.apk`
- Size: ~25 MB

Codemagic:

- Location: Artifacts section
- File: `app-release.apk`
- Size: ~25 MB

Bitrise:

- Location: Artifacts section
 - File: `app-release.apk`
 - Size: ~25 MB
-

Next Steps

1. Build the APK

- Choose one of the three services above
- Follow the steps
- Download the APK

2. Install on Phone

- Transfer APK to phone
- Tap to install

- Grant permissions

3. **Deploy to Play Store**

- Create developer account
 - Upload APK
 - Fill in details
 - Submit for review
-

All three services are FREE and take 5-10 minutes!

Choose GitHub Actions for the easiest experience.

Good luck! 🚀
